## SUBJECT INDEX

Arsenic-based thioacid
Supramolecular associations, secondary bonds, quasi-cyclic structures and heterogeometrism in metal derivatives of phosphorus- and arsenic-based thioacids and oxo analogs 325

Boron hydride
Chalcogeno boron hydrides 171

Chalcogeno boron hydrides
Chalcogeno boron hydrides 171
Clusters
Strain and resonance energies in main-group homoatomic rings and clusters 385
Cycloaddition
Transition-metal-functionalized homo- and heterocycles with phosphorus atoms 1
Cyclocondensation
Transition-metal-functionalized homo- and heterocycles with phosphorus atoms 1

Fluorine-containing nitrogen acids
Some fluorine-containing nitrogen acids and their derivatives 413

Fuel cells
Some fluorine-containing nitrogen acids and their derivatives 413

Heterocycle
Transition-metal-functionalized homo- and heterocycles with phosphorus atoms 1
Homocycle
Transition-metal-functionalized homo- and heterocycles with phosphorus atoms 1

Metal–nitrogen bonds
Phosphorane iminato complexes of main group elements 103

Nitrogen-containing sulphur(VI) compounds
Three-coordinate sulphur(VI)–nitrogen species: an attempt to breathe some new life into an old topic 233

Organoaluminium fluorides
Organometal fluorides of aluminium, gallium, indium and thallium 69
Organofluoro gallates
Organometal fluorides of aluminium, gallium, indium and thallium 69

Organogallium fluorides
Organometal fluorides of aluminium, gallium, indium and thallium 69
Organoindium fluorides
Organometal fluorides of aluminium, gallium, indium and thallium 69
Organometal fluorides
Organometal fluorides of aluminium, gallium, indium and thallium 69
Organothallium fluorides
Organometal fluorides of aluminium, gallium, indium and thallium 69

Phosphorane iminato complexes
Phosphorane iminato complexes of main group elements 103
Phosphoranes
Recent developments in the chemistry of three-coordinate pentavalent phosphorus compounds ($\sigma^3\lambda^5$-phosphoranes) 275
Phosphorus-based thioacid
Supramolecular associations, secondary bonds, quasi-cyclic structures and heterogeometrism in metal derivatives of phosphorus- and arsenic-based thioacids and oxo analogs 325
Phosphorus–carbon bonds
Recent developments in phosphono-transfer chemistry 359
Phosphorus compounds
Transition-metal-functionalized homo- and heterocycles with phosphorus atoms 1

Resonance energies
Strain and resonance energies in main-group homoatomic rings and clusters 385
Ring strain energies
Strain and resonance energies in main-group homoatomic rings and clusters 385

Stereocontrol in asymmetric variants
Recent developments in phosphono-transfer chemistry 359

Three-coordinate phosphorus(V) compounds
Recent developments in the chemistry of three-coordinate pentavalent phosphorus compounds ($\sigma^3\lambda^5$-phosphoranes) 275
Three-coordinate sulphur(VI)–nitrogen species: an attempt to breathe some new life into an old topic 233
Three-coordinate sulphur(VI) compounds
Three-coordinate sulphur(VI)–nitrogen species: an attempt to breathe some new life into an old topic 233
